- **U-Value:** Represents the heat flow through a window and is measures in BTU/hr-ft<sup>2</sup>. The lower the rating the better the reduction in heat loss.
- **Solar Heat Gain (SHGC):** Is used to measure the amount of radiated heat entering a building. The lower the rating, the better the glazing package is in preventing solar gain.
- Visible Transmittance (VT): Measures the amount of visible light transmitted through a window.
- **Condensation Resistance (CR):** Measures how well a window resists condensation on its interior surface. The higher the rating, the better the glazing package is able to resist condensation.

## **Comparative Glazing Packages**

- STC (Sound Transmission Class): is used to calculate the results of soundproofing between rooms or through walls. It is a measurement of decibel reduction. The STC Frequency Scale ranges from 125 Hz to 4000 Hz. The higher the number, the better the product in dampening ambient sound.
- **OITC (Outside Inside Transmission Class):** This rates the transfer of sound between an outdoor space and an indoor space. OITC has a frequency scale between 80 Hz and 4000 Hz and is used forncalculating sound controls against low frequency exterior sounds. The higher the number, the better the product is in dampening sound.

## Historic Flair meets Modern Performance

Visually Ageless, the Edgeline Series brings forward the graded sight lines of steel windows, but adds a Modern Twist and Urban Flair.

Designed to match the iconic look of yesterday and drawn to define the contemporary feel of tomorrow, the Edgeline series intertwines modern Technological Advances with a proprietary frame design to provide Superior Performance and Product Flexibility.

Uncompromised Construction, Framed to Perfection.

## A Modern Twist in a Retro Type of Way

Replicating the look and feel of steel, the Edgeline Series has been Engineered to meet the strictest building codes regardless of region or climate.

Uniquely stylized to Bridge the Patterns of contemporary Architectural Design, Dynamic Features and Simplistic Construction, these characteristics have been Blended together to offer FGIA certified AW-ratings tied to oversized gateway sizes.

A. Azon<sup>™</sup> Thermal Barrier utilizes a polyurethane foam that has been designed to create greater thermal performance throughout your entire home.

Meets the stringent Energy Star Standards across all 50 states.

B. Euro-Groove Frame and Sash System achieves a tighter perimeter seal and improves, water, air and wind performance characteristics.

C. 1" or 1-3/8" Glazing Pockets offer glass package options to fit every region and every climate.
